

Unleash the power of the
YubiKey with Axiaad Cloud

Better execution. Stronger authentication.

You need a strong, scalable authentication solution for your entire organization that's trustworthy, cost-effective, and easy-to-use. With the YubiKey and Axiad Cloud, your organization can easily deploy and manage a multi-factor authentication (MFA) solution to secure your digital interactions.

Maximize your investment and unleash the full power of this versatile security key. Combining Axiad's platform with the YubiKey delivers PKI, OTP, and FIDO authentication. Along with its signing and encryption capabilities, this solution delivers incredibly strong authentication that's simple and efficient.

Axiad Cloud unlocks the full capabilities of the YubiKey.

- Includes a credential management system (CMS), certificate authority (PKI), and authentication service—all of which easily plug into your enterprise's existing infrastructure.
- With one-click issuance and a self-service portal, we put our users at the center of our authentication solutions. This enables easy deployment, use, and management of enterprise credentials.
- We understand that success will look different to you in the future, which is why Axiad designs products to meet your security needs of today and tomorrow.
- Ensures trusted interactions for users, applications, machines, and systems throughout your entire digital ecosystem.
- Supports OTP, PKI, FIDO, and multiple form-factors, such as YubiKeys, smart cards, virtual smart cards, and mobile-based authenticators.

Axiad supports
all YubiKeys

Compatible

Works seamlessly on major browsers and operating systems, including but not limited to Microsoft Windows, MacOS, Linux, and Chrome OS.

Cost-effective

Secures and efficiently manages the lifecycle of devices and credentials, while saving on deployment and IT operational costs.

Proven

Axiad and Yubico are trusted by millions of users worldwide, including leading defense and aerospace, healthcare, infrastructure, and financial industries.

Axiad Cloud bolsters the YubiKey, expanding it from a user authentication device into a secure PKI device providing data and transactional security.

All inclusive infrastructure approach

- Axiad provides the core infrastructure components you need for a turnkey solution. This eliminates the need to manage multiple vendors, streamlining the process.

Trust for your digital interactions

- Extend protection beyond users—and your own workforce—to anywhere cybersecurity threats arise in your digital ecosystem.

Streamlined credential management

- Users can securely self-manage their YubiKey and certificates on their devices
- Administrators know who the devices belong to, allowing for easy revocation and termination of devices if a device is lost or a user leaves the company

At Axiad, our partnership with you doesn't end at product delivery, it just begins. We will empower you to achieve passwordless authentication, so that you're free to do business, communicate, and create value.

About Axiad

Axiad delivers an agile, user-centric identity platform that is trusted across leading enterprise, government, healthcare, and financial organizations. Our platform helps leaders manage cybersecurity risks, compliance, and operational efficiency for their workforce, partners, and customers.

Our approach starts with what customers need from a security and business perspective. With Axiad, companies get a single supplier providing an integrated solution without sacrificing security.
